Course Description

Why are so many students graduating from Christian schools, then abandoning their beliefs after the first or second year of college? If Christian schools are incorporating Biblical integration into their classes, why are students still falling away? As Christian teachers, we need to provide opportunities for our students to examine their own thinking and determine if their beliefs are in line with reality. Biblical Worldview Integration is not attaching a Bible verse to every lesson; rather, it is learning to see all of creation and all knowledge under the Lordship of Jesus Christ. This course will introduce effective strategies to help your students develop habits of thinking that are based on the truth and grounded in God’s word. This course counts toward both ACSI’s Christian Philosophy of Education (CPoE) requirement and educational studies hours for renewal of ACSI certification.

Note: Required textbooks must be acquired separately.

**National Standards Addressed in This Course**

**National Board for Professional Teaching Standards (NBPTS)**

First published in 1989 and updated in 2016, *What Teachers Should Know and Be Able to Do* articulates the National Board’s Five Core Propositions for teaching. The Five Core Propositions — comparable to medicine’s Hippocratic Oath — set forth the profession’s vision for accomplished teaching. Together, the propositions form the basis of all National Board Standards and the foundation for National Board Certification. Course assignments have been designed so students can demonstrate excellence against these professional teaching standards whenever possible.

- **Proposition 1**: Teachers are committed to students and their learning
- **Proposition 2**: Teachers know the subject they teach and how to teach those subjects to students
- **Proposition 3**: Teachers are responsible for managing and monitoring student learning
- **Proposition 4**: Teachers think systematically about their practice and learn from experience
- **Proposition 5**: Teachers are members of learning communities

**Common Core State Standards (CCSS)** ([www.corestandards.org](http://www.corestandards.org))

The Common Core State Standards provide a consistent, clear understanding of what students are expected to learn, so teachers and parents know what they need to do to help them. The standards are designed to be robust and relevant to the real world, reflecting the knowledge and skills that our young people need for success in college and careers. With American students fully prepared for the future, our communities will be best positioned to compete successfully in the global economy.

The grades 6–12 standards on the following pages define what students should understand and be able to do by the end of each grade span. They correspond to the College and Career Readiness (CCR) anchor standards below by number. The CCR and grade-specific standards are necessary complements—the former providing broad standards, the latter providing additional specificity—that together define the skills and understandings that all students must demonstrate.

In addition, students are encouraged to email or phone the instructor at any time. Students will also receive feedback on the required assignments as they are submitted.

**Discussion Forums**

Participation is an important expectation of this course and all online courses. Online discussions promote reflection and analysis while allowing students to appreciate and evaluate positions that others express. While students may not be engaging with the same students throughout this course they will be expected to offer comments, questions, and replies to the discussion question whenever possible. The faculty role in the discussion forum is that of an observer and facilitator.
Coursework Hours

Based on the Carnegie Unit standard, a unit of graduate credit measures academic credit based on the number of hours the student is engaged in learning. This includes all time spent on the course: reading the textbook, watching videos, listening to audio lessons, researching topics, writing papers, creating projects, developing lesson plans, posting to discussion boards, etc. Coursework offered for FPU Continuing Education graduate credit adheres to 45 hours per semester unit for the 900-level courses. Therefore, a student will spend approximately 135 hours on a typical 3-unit course.

Services for Students with Disabilities

Students with disabilities are eligible for reasonable accommodations in their academic work in all classes. In order to receive assistance, the student with a disability must provide the Academic Support Center with documentation, which describes the specific disability. The documentation must be from a qualified professional in the area of the disability (i.e. psychologist, physician or educational diagnostician). Students with disabilities should contact the Academic Support Center to discuss academic and other needs as soon as they are diagnosed with a disability. Once documentation is on file, arrangements for reasonable accommodations can be made.
