Course Description

Pilates is a popular low-impact exercise technique. It can be used to improve many aspects of physical fitness such as strength, flexibility, coordination, speed, agility, and endurance. Pilates also enhances body control and awareness, reduces aches and pains, increases balance, improves performance, and accelerates recovery. In this course, students will learn what pilates is designed to do and how to perform it safely and correctly. Participants will learn how to perform pilates techniques for the entire body. Course assignments encourage students to integrate specific Society of Health and Physical Educators (SHAPE) National Standards for K-12 Physical Education. Basic understanding of the science of pilates is also addressed. Participants are required to record themselves and upload the videos to websites. Videos taken from smartphones or tablets are sufficient.

Note: Required textbook and Pilates exercise equipment must be acquired separately.

National Standards Addressed in This Course

National Board for Professional Teaching Standards (NBPTS)

- Proposition 2: Teachers know the subject they teach and how to teach those subjects to students
- Proposition 3: Teachers are responsible for managing and monitoring student learning
- Proposition 4: Teachers think systematically about their practice and learn from experience
- Proposition 5: Teachers are members of learning communities

In addition, students are encouraged to email or phone the instructor at any time. Students will also receive feedback on the required assignments as they are submitted.

Forums

Participation is an important expectation of this course and all online courses. Online discussions promote reflection and analysis while allowing students to appreciate and evaluate positions that others express. While students may not be engaging with the same students throughout this course they will be expected to offer comments, questions, and replies to the discussion question whenever possible. The faculty role in the discussion forum is that of an observer and facilitator.

Coursework Hours

Based on the Carnegie Unit standard, a unit of graduate credit measures academic credit based on the number of hours the student is engaged in learning. This includes all time spent on the course: reading the textbook, watching videos, listening to audio lessons, researching topics, writing papers, creating projects, developing lesson plans, posting to discussion boards, etc. Coursework offered for FPU Continuing Education graduate credit adheres to 45 hours per semester unit for the 900-level courses. Therefore, a student will spend approximately 90 hours on a typical 2-unit course or 135 hours on a typical 3-unit course.

Services for Students with Disabilities

Students with disabilities are eligible for reasonable accommodations in their academic work in all classes. In order to receive assistance, the student with a disability must provide the Academic Support Center with documentation, which describes the specific disability. The documentation must be from a qualified professional in the area of the disability (i.e. psychologist, physician or educational diagnostician). Students with disabilities should contact the Academic Support Center to discuss academic and other needs as soon as they are diagnosed with a disability. Once documentation is on file, arrangements for reasonable accommodations can be made.
