**Course Description**

The course, Interactive Boards, is designed for any teacher, technology coordinator, principal, or librarian working with an interactive board or monitor. Students will learn different aspects of how interactive boards affect learning and become proficient in the basic skills needed to navigate the devices. Through the process of completing the required assignments the participants will develop strategies for using their interactive board in their curriculum. The course will provide participants with a set of directions for their device. From this, they will develop meaningful lessons centered on student needs that also meet subject matter standards and framework requirements using their interactive board. Participants will then create their own unit of study with accompanying lesson plans based on their local, state, and national standards. Finally, students will be using the Internet to do research on their device. This course is appropriate for all grade levels. Access to students is not required to complete this course.

National Standards Addressed in This Course

National Board for Professional Teaching Standards (NBPTS)  
(http://www.nbpts.org/standards-five-core-propositions/)

First published in 1989 and updated in 2016, *What Teachers Should Know and Be Able to Do* articulates the National Board’s Five Core Propositions for teaching. The Five Core Propositions—comparable to medicine’s Hippocratic Oath—are set forth the profession’s vision for accomplished teaching. Together, the propositions form the basis of all National Board Standards and the foundation for National Board Certification. Course assignments have been designed so students can demonstrate excellence against these professional teaching standards whenever possible.

- Proposition 1: Teachers are committed to students and their learning
- Proposition 2: Teachers know the subject they teach and how to teach those subjects to students
- Proposition 3: Teachers are responsible for managing and monitoring student learning
- Proposition 4: Teachers think systematically about their practice and learn from experience
- Proposition 5: Teachers are members of learning communities

Participation is an important expectation of this course and all online courses. Online discussions promote reflection and analysis while allowing students to appreciate and evaluate positions that others express. While students may not be engaging with the same students throughout this course they will be expected to offer comments, questions, and replies to the discussion question whenever possible. The faculty role in the discussion forum is that of an observer and facilitator.

Coursework Hours

Based on the Carnegie Unit standard, a unit of graduate credit measures academic credit based on the number of hours the student is engaged in learning. This includes all time spent on the course: reading the textbook, watching videos, listening to audio lessons, researching topics, writing papers, creating projects, developing lesson plans, posting to discussion boards, etc. Coursework offered for FPU Continuing Education graduate credit adheres to 45 hours per semester unit for the 900-level courses. Therefore, a student will spend approximately 135 hours on a typical 3-unit course.

Services for Students with Disabilities

Students with disabilities are eligible for reasonable accommodations in their academic work in all classes. In order to receive assistance, the student with a disability must provide the Academic Support Center with documentation, which describes the specific disability.
